WORK EXPERIENCE

Data Scientist

October 2022 — October 2025

Town of Cary

Cary, NC

- Reduced annual infrastructure costs by \$100,000 through a comprehensive utilization audit of Cary's on-premises SAS 9.4 cluster, identifying and removing underutilized vendor services.
- Deployed and trained users on QGIS, GRASS, PostgreSQL, and PostGIS for geospatial analysis workflows, integrating open-source workflows with Cary's existing ArcGIS Enterprise and ArcGIS Online environment and reducing software licensing costs by \$8,400 annually.
- Saved \$14,000 annually in maintenance costs by creating an inventory and map of Cary's Eco-Counter sites and people-counting equipment.
- Built data pipelines using Python, SAS 9.4, Power BI, and Huwise for internal and public stakeholders.
- Supported and administered enterprise analytics infrastructure, including Microsoft Azure resources, Power BI Dataflows and workspaces, SAS 9.4 on Windows Server and Red Hat Enterprise Linux, and SAS Viya 4.
- Created public-facing dashboards and data applications using Huwise's Bootstrap and AngularJS component library.
- Founded the Python Inter-Department User Group and trained staff across departments in Python, SQL, and Git.
- Collaborated across city departments to improve data practices, infrastructure, and governance, strengthening Cary's eligibility for Platinum-level certification through the What Works Cities Certification program.

Software Engineer & Project Manager

Sep 2021 — Sep 2023

Old North Collective

Raleigh, NC

- Won B2B Excellence Award for 2021: awarded to top 6 companies out of 6,500 eligible BigCommerce partners from North and South America through successful integrations between Salesforce, BundleB2B, and BigCommerce.
- Created integrations between Salesforce, BundleB2B, and BigCommerce REST APIs using Celigo's integrator.io platform.
- Managed end-to-end delivery of four BigCommerce e-commerce websites, leading distributed development teams across Australia and India.
- Developed and deployed integrations connecting payment services and Avalara tax calculation tools with Acumatica, Salesforce, and BigCommerce platforms.
- Customized front-end functionality for BigCommerce storefronts using HTML, CSS, and Handlebars templates.

Data Analyst & Python Programmer

Jul 2019 — Oct 2022

Southern Energy Management

Raleigh, NC

- Saved \$40,000 per year through increased productivity by transitioning company's reporting infrastructure to a new web platform and created new lines of business by reporting previously unrecognized trends found in energy-efficiency testing data to builders.
- Delivered \$10,000 in annual labor savings by developing a Python automation using Selenium and pandas to eliminate duplicate entries in the invoicing pipeline.
- Expanded quality assurance data coverage from 20% to 100% by developing Python scripts to aggregate and analyze service data, saving approximately \$95,000 annually in labor costs.
- Built an automated integration between MySQL, Google Sheets, HubSpot, and Sakari to send SMS notifications to site supervisors confirming job site readiness before field technician arrival, reducing wasted trips and missed inspections.
- Managed developer operations and deployment of data pipelines for data team.
- Introduced Git and GitHub as a form of source control for company, training users and data team.

Lead Solar Installer

May 2019 — Jul 2019

Southern Energy Management

Raleigh, NC

- Led a team of five Solar Installation Technicians in installing, commissioning, troubleshooting, and maintaining photovoltaic systems.
- Configured SolarEdge monitoring systems to collect and analyze long-term photovoltaic performance data, identifying performance issues and supporting system troubleshooting.
- Provided field maintenance and troubleshooting repairs to ensure sites were back online with less than single day downtime.

Solar Installer

Jun 2018 — May 2019

Southern Energy Management

Raleigh, NC

- Installed and commissioned grid-tied photovoltaic systems, including panels, inverters, racking, electrical components, and monitoring equipment.
- Created system layouts and string maps, optimized panel configurations for site conditions, and troubleshoot installation challenges while maintaining safety and quality standards.

Aquatics Technician

Jul 2017 — Jun 2018

Triangle Pond Management, LLC

Raleigh, NC

- Built a Python-based calculator to accurately determine herbicide and algaecide application mixtures for aquatic vegetation management.
- Created waterbody management plans and technical reports, updated treatment protocols, and conducted field assessments of aquatic vegetation and stormwater management infrastructure.

Undergraduate Teaching Assistant

Jan 2017 — Jun 2017

North Carolina State University

Raleigh, NC

- Collaborated with faculty to develop course materials and contributed to the course's adoption as a permanent part of the curriculum.
- Designed an online student-feedback system to streamline collection and organization of course feedback.
- Led class discussions on environmental social justice, facilitating student engagement and discussion.

OPEN SOURCE CONTRIBUTIONS

GRASS GIS

Geospatial Engine

- Collaborated with project maintainers to deploy OpenSSF Scorecard security checks and investigate security findings.
- Delivered presentation on "Using GRASS for Open Data Pipelines" at the 2025 GRASS Developer Summit.
- Created pixi installation documentation and revised contributor and user documentation to improve accessibility for new users.

QGIS

Desktop Geospatial Software

- Supported the adoption of the OpenSSF Scorecard integration and collaborated with project maintainers to address security findings.
- Documented installation of QGIS using pixi and the conda-forge ecosystem.

DuckDB

Analytical Database

- Improved documentation for DuckDB's spatial extension with GeoJSON examples and guidance for tracking Coordinate Reference Systems (CRS) in geospatial data.

EDUCATION

North Carolina State University

Aug 2013 — May 2017

Bachelor of Science in Fisheries, Wildlife and Conservation Biology

Raleigh, NC

SKILLS

Programming Languages: Python, R, SQL, Rust, SAS.

Analytics Engineering: Apache Airflow, SQLMesh, PostgreSQL, PostGIS, SQL Server, DuckDB, SQLite, ETL/ELT, REST APIs, Git/GitHub.

Geospatial: ArcGIS Pro, QGIS, GRASS GIS.

Cloud & Infrastructure: Microsoft Azure, Azure Government, Red Hat Enterprise Linux (RHEL), Docker, NixOS, Nix, pixi, conda-forge.
