WORK EXPERIENCE

Data Scientist

October 2022 — October 2025

Town of Cary

Cary, NC

- Reduced annual infrastructure costs by \$100,000 through a comprehensive utilization audit of Cary's on-premises SAS 9.4 cluster, removing underutilized vendor services.
- Created inventory and map of Cary's Eco-Counter sites and people-counting equipment, saving \$14,000 per year in maintenance costs.
- Saved \$8,400 annually in software licensing costs by deploying and training users on QGIS, GRASS, PostgreSQL, and PostGIS for geospatial mapping and analysis workflows.
- Initiated the Python Inter-Department User Group and trained users on Python, SQL, and Git.
- Supported and administered enterprise analytics infrastructure, including Microsoft Azure resources, Power BI Dataflows and workspaces, SAS 9.4 (Windows Server and Red Hat Enterprise Linux), and SAS Viya 4.
- Built data pipelines using Python, SAS 9.4, Microsoft PowerBI and Huwise (formerly Opendatasoft) Platform for internal and public stakeholders.
- Created public-facing dashboards and data applications using Huwise's Bootstrap and AngularJS component library.
- Collaborated across departments with data professionals to improve Cary, NC's eligibility for What Works Cities Certification from Silver to Platinum level.

Project Manager & Developer

Sep 2021 — Sep 2023

Old North Collective

Raleigh, NC

- Won B2B Excellent Award for 2021: awarded to top 6 companies out of 6,500 eligible BigCommerce partners from North and South America through successful integrations between Salesforce, BundleB2B, and BigCommerce.
- Created integrations between Salesforce, BundleB2B, and BigCommerce REST APIs using Celigo's integrator.io platform.
- Managed end-to-end delivery of four BigCommerce e-commerce websites, leading distributed development teams across Australia and India.
- Developed and deployed integrations connecting payment services and Avalara tax calculation tools with Acumatica, Salesforce, and BigCommerce platforms.
- Troubleshoot UI problems within BigCommerce themes by editing HTML, CSS, and logic for Handlebars functions.

Data Analyst & Programmer

Jul 2019 — Oct 2022

Southern Energy Management

Raleigh, NC

- Saved \$40,000 per year through increased productivity by transitioning company's reporting infrastructure to a new web platform and created new lines of business by reporting previously unrecognized trends found in energy-efficiency testing data to builders.
- Delivered \$10,000 in annual labor savings by developing a Python automation using Selenium and pandas to eliminate duplicate entries in the invoicing pipeline.
- Expanded quality assurance data coverage from 20% to 100% by developing Python scripts to aggregate and analyze service data, saving approximately \$95,000 annually in labor costs.
- Built an automated integration between MySQL, Google Sheets, HubSpot, and Sakari to send SMS notifications to site supervisors confirming job site readiness before field technician arrival, reducing wasted trips and missed inspections.
- Managed developer operations and deployment of data pipelines for data team.
- Introduced Git and GitHub as a form of source control for company, training users and data team.
